## V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

### 1. Statement

Novelty (N)	Claims	1-9	YES
	Claims		NO
Inventive step (IS)	Claims	1-9	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-9	YES
	Claims		NO

### 2. Citations and explanations

1.

D1 (DE-A-199 60 079), which is considered to be the closest prior art, discloses (page 4, lines 26-68) a method for the energy management of air-conditioning units in motor vehicles, from which the subject matter of claim 1 differs in that:

- in a method step S1 the two air-conditioning compressors are assigned priorities and
- the activation of the two or more air-conditioning compressors after the start-up of an engine of the motor vehicle takes place in the priority sequence assigned in step 1, delayed by a time (T).

The problem addressed by the present invention can therefore be considered that of improving the start-up process of two or more air-conditioning compressors for the drive motor.

Although D2 (US-4 614 089) has already described a method for the time-delayed start-up of a plurality of air-conditioning compressors, said document does not mention a method step for the prior assignment of relative

priorities to the two compressors.

The method defined in claim 1 is not therefore suggested in any of the search report citations.

The subject matter of claim 1 is therefore novel and inventive (PCT Article 33(2) and (3)).

2.

Claims 2-9 are dependent on claim 1 and therefore likewise satisfy the PCT novelty and inventive step requirements.
